Canada's Trade Challenge

Donald Trump has made it clear he is not backing down on **tariffs** against Canada. His tough stance has surprised those who claimed the U.S. president would change his mind at the last minute. Instead, he has pressed on, targeting Canada's exports and raising questions about the future of one of the world's most important trade relationships.

At the centre of this standoff is CUSMA (Canada-United States-Mexico Agreement). CUSMA replaced the old NAFTA deal. It is vital for Canada's **economy** because it allows goods to move across the border with little to no tariffs.

About three-quarters of Canadian exports go to the United States. This makes tariff-free trade critical for Canadian industries such as cars, steel, and agriculture. Losing that access would mean Canadian products would become more expensive in the U.S., hurting businesses and jobs on both sides of the border.

The current CUSMA agreement has a built-in review starting

July 2026. With tensions rising now, consultations could begin much sooner. Trump is using new tariffs as **leverage**, likely aiming to negotiate changes to the deal that better suit American interests. Experts believe this strategy is more about getting more out of the next CUSMA bargain than fixing economic problems.

What can Canada do now? Government leaders say they aren't rushing—they want a good deal, not a quick fix. Prime Minister Mark Carney and his team are under pressure to protect Canada's access to the vast U.S. market, but they are also balancing the need not to give up too much in return. Canadian officials stress they will take as much time as necessary to secure what is best for Canada's future.

Canada's businesses are anxious. Uncertainty can put jobs and investments at risk. Some are calling on the government not to agree to a "bad deal" just to end the dispute. The long game for Canada is simple: protect tariff-free access to the U.S., stay a

step ahead of the United States, and be ready to stand firm when CUSMA talks get serious over the next year or two.

Whether Trump's threat leads to a big shift or is just a political tactic, one thing is certain—Canada's next move will decide the country's economic outlook for years to come. ★

DID YOU KNOW

NAFTA was a trade agreement between Canada, the United States, and Mexico that made trade easier. It started on January 1, 1994, and helped reduce barriers between the countries.

WORD POWER

TARIFFS: Special taxes that a government puts on goods coming into the country from another country

ECONOMY: The system of how money is made and used in a country

LEVERAGE: The ability to influence what people do

INTERNATIONAL

Ceasefire Reached in Thailand-Cambodia Conflict

Thailand and Cambodia have agreed to a **ceasefire** after deadly clashes along their shared border forced more than 300 000 people to leave their homes. The ceasefire brings some hope, but the issues behind the fighting are deep and complicated.

The recent violence started in late May when a Cambodian soldier was killed. This event increased tensions between the two countries, but the conflict goes back many years.

The main cause of the clashes is a long-standing border **dispute** between Thailand and Cambodia. Both countries claim ownership of land near the ancient temple called Preah Vihear. In 1962, the International Court of Justice ruled the temple itself belongs to Cambodia. However, the exact borders around the temple were never clearly defined, creating confusion and disagreement. Over decades, this unclear border has caused repeated arguments and fighting. Both countries have sent their soldiers to protect what they believe is their land.

Tensions have been fueled by

strong feelings of national pride and the desire to protect territory. The border area is important not only because of the temple's cultural value but also because of strategic and economic reasons. Each side sees giving up ground as losing part of their country. This has made it hard for leaders to reach a lasting agreement.

The recent violence destroyed many homes, forcing large numbers of people to flee their towns and villages. These families now live in temporary shelters, facing uncertainty about when they can return. The fighting also hurt trade and damaged relations between Thailand and Cambodia, causing more worry among people who want peace.

Both governments have said they want to keep peace and resolve future problems through talks instead of fighting, but experts warn that unless the border dispute is carefully and clearly settled, more clashes could happen. The anger and mistrust have built up over many years, and one ceasefire might not be enough to solve all the problems.

Many people in the border region hope the ceasefire holds. They want their leaders to find real solutions and end the cycle of violence forever. For now, they wait and watch, hoping for peace but prepared for the possibility that tensions could rise again. Only time will tell if this ceasefire will lead to lasting peace between Thailand and Cambodia. ★

DID YOU KNOW

Thailand is the only Southeast Asian country that was never colonized by European powers.

WORD POWER

CEASEFIRE: An agreement between two sides to stop fighting, at least for a while, so they can try to make peace

DISPUTE: A serious argument or disagreement between people or countries about something important, like land

INDIGENOUS CONNECTIONS

Cleanup of Polluted Mine Sites

The Carcross/Tagish First Nation is now in charge of important projects to clean up three sites that have been polluted by mining operations.

The Carcross/Tagish First Nation is located in Yukon. Their traditional territory includes the area around Carcross and Tagish and extends to the border with British Columbia.

For many years, mining companies worked near the land where the Carcross/Tagish people have lived for generations. Over time, waste from the Mt. Nansen, Canyon City, and Whitehorse Copper mine sites, including **heavy metals** and dangerous chemicals, leaked into the ground and nearby lakes. This caused damage to the environment and created risks for plants, animals, and the people who use the land for hunting, fishing, and living.

The Carcross/Tagish First Nation recently signed an agreement with the federal government that lets them take charge of the cleanup process. This means the First Nation can make decisions about how to fix the land in a way that

respects their culture, values, and knowledge. Being the ones in control of the process means they can make sure the cleanup helps their community and the land for many years to come.

Taking control of the cleanup also helps the community in other ways. It gives people the chance to learn new skills and find jobs through the work needed to clean the sites. It also shows respect for the First Nation's right to care for their land, especially after outside companies were in charge for so long and caused the damage. This new partnership between the federal government and the Carcross/Tagish First Nation is a step toward healing past harms and building a better future.

This cleanup work also helps repair the damage done to the land and water, making it safer for plants, animals, and people. It supports the community's connection to their **traditional** territory and helps protect their way of life.

Overall, the fact that the Carcross/Tagish First Nation is leading these cleanup projects is a positive move for the

environment and for the people. It lets the community have a strong voice in deciding how to restore their land and care for their home. This shows respect for Indigenous rights and helps build trust between the First Nation and the government. The work ahead will be hard, but it gives hope for a healthier and safer future. ★

DID YOU KNOW

Some heavy metals, like iron and zinc, are important for our health in small amounts, but many heavy metals can be harmful if too much gets into our bodies, the soil, or water. They can build up and cause health problems for people, animals, and plants

HEAVY METALS: A group of metals that are heavier than most other metals

TRADITIONAL: Related to the long-held customs, beliefs, or ways of life passed down in a community

ENVIRONMENT

Tsunami Warnings

A very strong earthquake hit near Russia's Kamchatka Peninsula, causing concern about **tsunami** waves along the Pacific Ocean.

The earthquake occurred on July 30, 2025, off the eastern coast of Russia's Kamchatka Peninsula. It measured 8.8 in **magnitude**, making it one of the strongest earthquakes ever recorded. It was powerful enough to shake the ground and sea floor dramatically.

When earthquakes like this happen under or near the ocean, they can create tsunamis. A tsunami is a series of very large waves made when the sea floor suddenly moves. This can happen during earthquakes, underwater landslides, or volcanic eruptions. Tsunamis travel fast across the ocean and grow taller and more dangerous when they reach shallow shores. These waves can flood towns and cities near the coast.

After the earthquake in Russia, government officials in Japan quickly warned about possible tsunamis. They set up alerts to tell people to move to higher

ground just in case. The tsunami warnings in Japan were lifted after it became clear no harmful waves would reach their coast.

Waves from the earthquake kept moving across the Pacific Ocean and eventually reached the west coast of the United States. These waves were smaller and less dangerous than first feared. Still, officials in the US monitored the situation carefully to protect people living near the ocean.

The main concern with tsunamis is how fast and powerful they can be. When an earthquake happens underwater, there is very little time to warn people. This is why many countries around the Pacific Ocean have early warning systems. These systems detect earthquakes and changes in sea levels quickly so people can be alerted and evacuate if needed.

This recent earthquake showed how important it is for countries to work together and stay prepared for natural disasters like tsunamis.

Even though the waves were not damaging, the event reminds everyone to stay alert and listen to

warnings. Tsunamis can happen suddenly and cause great harm, so being ready can save lives and reduce damage. Communities along the Pacific will continue learning and improving their safety plans to stay safe in the future. Scientists continue to study earthquakes and tsunamis to better understand how to predict them and keep communities safe. ★

WORD POWER

TSUNAMI: A series of very large ocean waves caused by underwater earthquakes or other events that push the water suddenly

MAGNITUDE: A number that shows how strong or powerful an earthquake is

FEATURE

National Day for Truth and Reconciliation

The National Day for Truth and Reconciliation is observed every year on September 30. It is a day that was created to honour the Indigenous children who were taken to residential schools, their families, and their communities.

The purpose of this day is to remember the tragic history and the lasting effects of the Canadian Indian residential school system. Residential schools were government-supported institutions designed to force Indigenous children to abandon their culture and language. The Truth and Reconciliation Commission, which ran from 2008 to 2015, revealed how these schools caused deep harm and cultural loss for Indigenous communities across Canada.

The National Day for Truth and Reconciliation became an official federal holiday in Canada in 2021. Before that, starting in 2013, September 30 was known as Orange Shirt Day. The orange shirt symbolizes the story of Phyllis Webstad, a residential school survivor whose new orange

shirt was taken away on her first day of school. The shirt has become a symbol of the forced **assimilation** many Indigenous children experienced.

The National Day for Truth and Reconciliation was needed because Indigenous Peoples and their allies wanted a specific day to acknowledge these past wrongs and work towards healing and understanding. It is also a call for Canadians to recognize the ongoing **discrimination** and challenges Indigenous communities face. By pausing to remember and learn, the day supports the goal of reconciliation, which involves building respectful relationships between Indigenous and non-Indigenous Peoples.

This day is an important chance for people across Canada to participate in events, wear orange shirts, and take time to reflect on how the country can better support Indigenous rights and cultures. Although the legislation made it a holiday for federal workers and many provincial workers, its meaning reaches far beyond a day off

work. It invites every Canadian to engage with the truth of history and to be part of the journey toward fairness and respect.

The first National Day for Truth and Reconciliation was marked in 2021 with messages from leaders, memorial events, and community gatherings. It serves as a reminder that truth and healing are ongoing processes. The National Day for Truth and Reconciliation is a step forward in recognizing the past and working toward a better future for Indigenous Peoples and all Canadians. ★

DID YOU KNOW

The Truth and Reconciliation Commission of Canada made 94 Calls to Action to help repair the harms caused by residential schools.

Earthquake Strength

Earthquakes are measured on the Moment Magnitude Scale (MMS). Scientists use the MMS to determine the magnitude (strength) of an earthquake. The MMS measures the total energy of an earthquake. Below is a description of what happens when earthquakes of different strengths strike. The higher the number gets, the worse the damage becomes.

9.0 and above	Causes complete devastation.
8.0	Very few buildings stay up. Bridges fall down. Underground pipes burst. Railroad rails bend. Large rocks move. Smaller objects are tossed into the air. Some objects are swallowed up by the earth.
7.0	It is hard to keep your balance. The ground cracks. Roads shake. Weak buildings fall down. Other buildings are badly damaged.
6.0	Pictures can fall off walls. Furniture moves. In some buildings, walls may crack.
5.0	If you are in a car, it may rock. Glasses and dishes may rattle. Windows may break.
4.0	Buildings shake a little. It feels like a truck is passing by your house.
3.0	You may notice this quake if you are sitting still, or upstairs in a house. A hanging object, like a model airplane, may swing.
2.0	Trees sway. Small ponds ripple. Doors swing slowly. But you can't tell that an earthquake is to blame.
1.0	Earthquakes this small happen below ground. You can't feel them.

1. MMS stands for what?

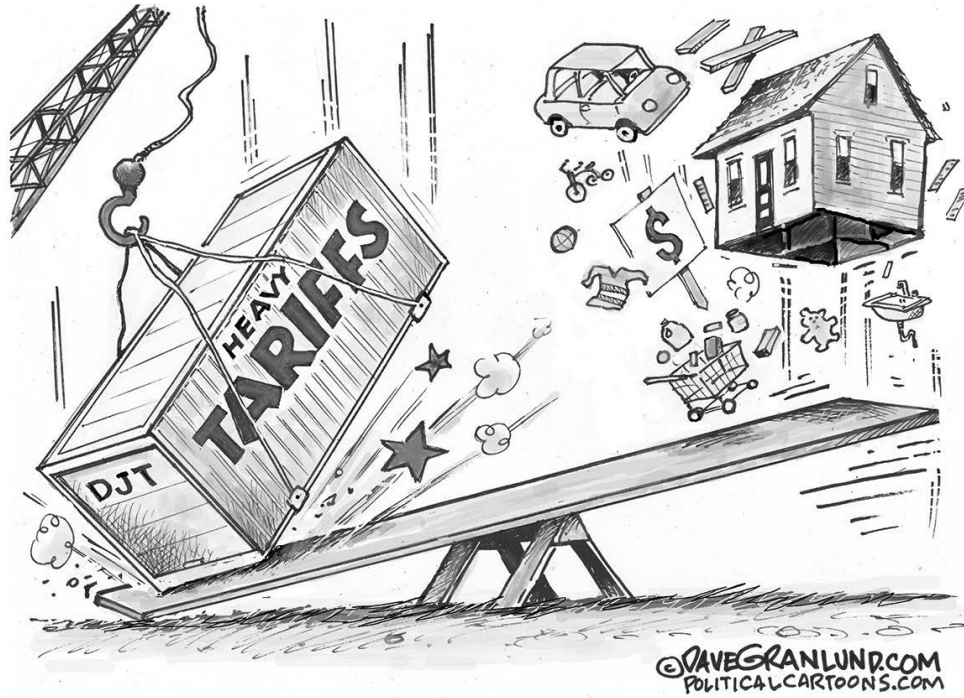

2. What damage is done by a 1.0 magnitude earthquake?

3. What damage is done by a 6.0 magnitude earthquake?

4. What damage is done by an earthquake with a magnitude of 9.0 or above?

Political Cartoon

A political cartoon uses images to exaggerate an opinion, often in a humorous way. The main purpose of the cartoon is to show you the artist's point of view on a situation.

For each element in the image above, write a point or two about the element or how it relates to the rest of the image.

1. The item on the left

2. The items on the right

3. Put all of the elements together and explain in your own words what the cartoon is saying.

Map Activity: Cambodia

1. Locate and label the following countries:

CAMBODIA

CHINA

INDIA

LAOS

Malaysia

MYANMAR (BURMA)

THAILAND

VIETNAM

2. Locate and label the following cities:

Phnom Penh

Bangkok

Hanoi

Nay Pyi Taw

Vientiane

3. Locate and label the following bodies of salt water:

Andaman Sea

Gulf of Thailand

South China Sea

4. Create a colour legend for your map with the following:

Cambodia

Other Countries

Salt Water

5. Draw and label the compass bearing.

6. Label your map:

Cambodia and Neighbouring Countries

Map Activity: Cambodia

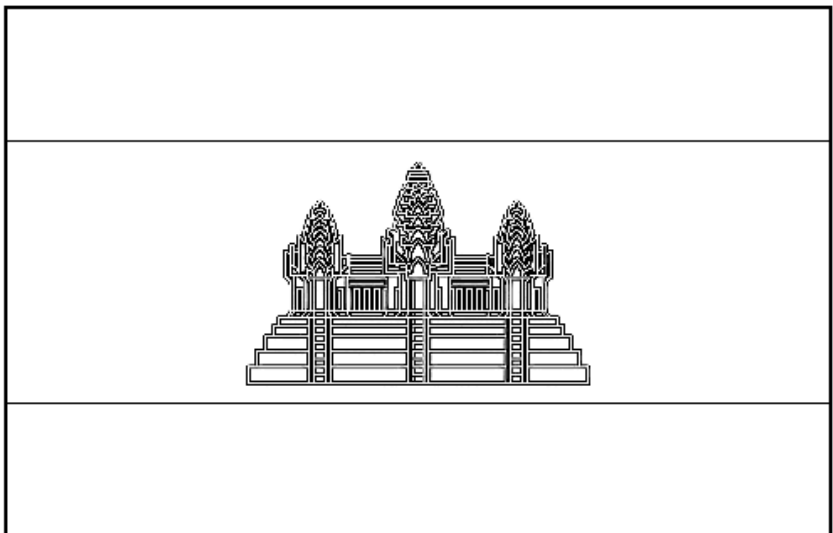

Looking at Cambodia

Cambodia is part of the continent of Asia. It borders the Gulf of Thailand, between Thailand, Vietnam, and Laos. It is located 13 degrees north of the equator, giving it a climate that is tropical. Cambodia is almost one-half the size of Newfoundland and Labrador at 181 035 square kilometres. Cambodia has a population of 17 063 669 (2024 estimate) and a currency called the Cambodian riel (KHR). It takes almost 3000 riels to equal one Canadian dollar.

Use the map and the information on this page to answer the following questions.

1. What is the area of Cambodia? _____
2. What is the population of Cambodia? _____
3. What is the capital city of Cambodia? _____
4. What is the currency used in Cambodia? _____
5. What colours are on the flag of Cambodia? _____
6. Which countries border Cambodia? _____

7. Colour the flag as follows:
 Three horizontal bands of blue (top), red (double-width), and blue, with a white, three-towered temple representing Angkor Wat outlined in black in the centre of the red band

CEASEFIRE REACHED IN THAILAND-CAMBODIA CONFLICT

1. Both Thailand and Cambodia claim ownership of land near the ancient city called Preah Vihear.
True False
2. Each side sees giving up ground as losing part of their _____.

CLEANUP OF POLLUTED MINE SITES

1. For many years, _____ companies worked near the land where the Carcross/Tagish people have lived for generations.
2. Taking control of the cleanup gives people the chance to learn new skills and find jobs through the work needed to clean the sites.
True False

TSUNAMI WARNINGS

1. How strong was the earthquake on July 30, 2025?
A. 6.5 B. 7.5 C. 8.8 D. 9.2
2. Waves from the earthquake kept moving across the _____ and eventually reached the west coast of the United States.

Monthly News Answer Key

Canada's Trade Challenge

- 1. What is at the centre of this standoff? Why?**
At the centre of this standoff is CUSMA (Canada-United States-Mexico Agreement). CUSMA replaced the old NAFTA deal. It is vital for Canada's economy because it allows goods to move across the border with little to no tariffs.
- 2. Why is tariff-free trade critical for Canada?**
About three-quarters of Canadian exports go to the United States. This makes tariff-free trade critical for Canadian industries such as cars, steel, and agriculture. Losing that access would mean Canadian products would become more expensive in the U.S., hurting businesses and jobs on both sides of the border.
- 3. How is Trump using the new tariffs?**
Trump is using new tariffs as leverage, likely aiming to negotiate changes to the deal that better suit American interests. Experts believe this strategy is more about getting more out of the next CUSMA bargain than fixing economic problems.
- 4. Why aren't Canada's government leaders rushing?**
They want a good deal, not a quick fix. Prime Minister Mark Carney and his team are under pressure to protect Canada's access to the vast U.S. market, but they are also balancing the need not to give up too much in return. Canadian officials stress they will take as much time as necessary to secure what is best for Canada's future.
- 5. How are Canadian businesses feeling?**
Canada's businesses are anxious. Uncertainty can put jobs and investments at risk. Some are calling on the government not to agree to a "bad deal" just to end the dispute.

Ceasefire Reached in Thailand-Cambodia Conflict

- 1. What is the main cause of the clashes?**
The main cause of the clashes is a long-standing border dispute between Thailand and Cambodia. Both countries claim ownership of land near the ancient temple called Preah Vihear.
- 2. What happened in 1962 that contributed to the dispute?**
In 1962, the International Court of Justice ruled the temple itself belongs to Cambodia. However, the exact borders around the temple were never clearly defined, creating confusion and disagreement.
- 3. What has fueled the tensions?**
Tensions have been fueled by strong feelings of national pride and the desire to protect territory. The border area is important not only because of the temple's cultural value but also because of strategic and economic reasons. Each side sees giving up ground as losing part of their country. This has made it hard for leaders to reach a lasting agreement.
- 4. What has occurred due to the recent violence?**
The recent violence destroyed many homes, forcing large numbers of people to flee their towns and villages. These families now live in temporary shelters, facing uncertainty about when they can return. The fighting also hurt trade and damaged relations between Thailand and Cambodia, causing more worry among people who want peace.
- 5. What have both governments said? Why may this not be easy to do?**
Both governments have said they want to keep peace and resolve future problems through talks instead of fighting, but experts warn that unless the border dispute is carefully and clearly settled, more clashes could happen. The anger and mistrust have built up over many years, and one ceasefire might not be enough to solve all the problems.

Cleanup of Polluted Mine Sites

1. Where is the Carcross/Tagish First Nation located?

The Carcross/Tagish First Nation is located in Yukon. Their traditional territory includes the area around Carcross and Tagish and extends to the border with British Columbia.

2. What was done for many years? What did this cause?

For many years, mining companies worked near the land where the Carcross/Tagish people have lived for generations. Over time, waste from the Mt. Nansen, Canyon City, and Whitehorse Copper mine sites, including heavy metals and dangerous chemicals, leaked into the ground and nearby lakes. This caused damage to the environment and created risks for plants, animals, and the people who use the land for hunting, fishing, and living.

3. What agreement did the Carcross/Tagish First Nation recently sign?

The Carcross/Tagish First Nation recently signed an agreement with the federal government that lets them take charge of the cleanup process. This means the First Nation can make decisions about how to fix the land in a way that respects their culture, values, and knowledge.

4. How does taking control of the cleanup help the community?

It gives people the chance to learn new skills and find jobs through the work needed to clean the sites. It also shows respect for the First Nation's right to care for their land, especially after outside companies were in charge for so long and caused the damage.

5. What does the cleanup work also help?

This cleanup work also helps repair the damage done to the land and water, making it safer for plants, animals, and people. It supports the community's connection to their traditional territory and helps protect their way of life.

Tsunami Warnings

1. What happened on July 30?

An earthquake occurred on July 30, 2025, off the eastern coast of Russia's Kamchatka Peninsula. It measured 8.8 in magnitude, making it one of the strongest earthquakes ever recorded. It was powerful enough to shake the ground and sea floor dramatically.

2. What is a tsunami? Why can they be dangerous?

A tsunami is a series of very large waves made when the sea floor suddenly moves. This can happen during earthquakes, underwater landslides, or volcanic eruptions. Tsunamis travel fast across the ocean and grow taller and more dangerous when they reach shallow shores. These waves can flood towns and cities near the coast.

3. What did Japan do?

After the earthquake in Russia, government officials in Japan quickly warned about possible tsunamis. They set up alerts to tell people to move to higher ground just in case. The tsunami warnings in Japan were lifted after it became clear no harmful waves would reach their coast.

4. What is the main concern with tsunamis?

The main concern with tsunamis is how fast and powerful they can be. When an earthquake happens underwater, there is very little time to warn people. This is why many countries around the Pacific Ocean have early warning systems. These systems detect earthquakes and changes in sea levels quickly so people can be alerted and evacuate if needed.

5. What does this event remind everyone to do? Why?

Even though the waves were not damaging, the event reminds everyone to stay alert and listen to warnings. Tsunamis can happen suddenly and cause great harm, so being ready can save lives and reduce damage.

National Day for Truth and Reconciliation

1. What is the purpose of the National Day for Truth and Reconciliation?

The purpose of this day is to remember the tragic history and the lasting effects of the Canadian Indian residential school system.

2. What were residential schools?

Residential schools were government-supported institutions designed to force Indigenous children to abandon their culture and language.

3. Before becoming a federal holiday, what was September 30 known as?

Before that, starting in 2013, September 30 was known as Orange Shirt Day. The orange shirt symbolizes the story of Phyllis Webstad, a residential school survivor whose new orange shirt was taken away on her first day of school. The shirt has become a symbol of the forced assimilation many Indigenous children experienced.

4. Why was the National Day for Truth and Reconciliation needed?

The National Day for Truth and Reconciliation was needed because Indigenous Peoples and their allies wanted a specific day to acknowledge these past wrongs and work towards healing and understanding. It is also a call for Canadians to recognize the ongoing discrimination and challenges Indigenous communities face. By pausing to remember and learn, the day supports the goal of reconciliation, which involves building respectful relationships between Indigenous and non-Indigenous Peoples.

5. How can people honour this day?

This day is an important chance for people across Canada to participate in events, wear orange shirts, and take time to reflect on how the country can better support Indigenous rights and cultures. Although the legislation made it a holiday for federal workers and many provincial workers, its meaning reaches far beyond a day off work. It invites every Canadian to engage with the truth of history and to be part of the journey toward

fairness and respect.
